

New MT4 server Horseforex-live Notice

We are pleased to inform you that we have decided to launch the new Metatrader4 trading software HorseForex-Live and HorseForex-Demo after testing the stability of the aforesaid server. Therefore, connections issues will be mitigated by that especially in the mainland Asia.

Hence you can choose Data centers from LD-London, TY-Tokyo, VG-US Virginia, DB-Dubai, SL-Seoul, HK-Hong Kong, SG-Singapore, CN1, 2-China. There are 9 different DC available from which you can choose from covering Europe, Middle East, East Asia, Southeast Asia and North America. The new server configuration has an average execution speed of less than 40 milliseconds, and low-latency fiber is cross-connected to our LP' s. As per the above areas, our clients can enjoy ultra-fast order execution experience

If you would like to trade with the new trading software MT4, you can visit our official website and decide on which device you may want to download. Available devices are, MT4 windows / MT4 Apple computer / MT4 Android mobile / MT4 Apple mobile Download, download link:
